

The Russian Program Exam 2020 solutions are not posted in the system, because almost all problems of this exam were used in the April 2021 exam (with some corrections).

The structure of the upcoming exam on May 30 is standard for this year: two 30-point obligatory questions, and one out of two 40-point choice questions. The duration of the exam is 2 hours without a break. The topics and level of difficulty of the tasks correspond roughly to the tasks of the London exam, which were solved during the year in group seminars.

We remind you on the necessity to have scientific (not programmable) calculator at the exam. Simple arithmetic calculator is not enough for some calculations.
